Trustive's Brazilian Network grows by almost 50%

Trustive's Brazilian WiFi network expands to 2500+ premium locations and includes full coverage (in both the arrival and departure halls) at 10 international Brazilian airports.

London, 13/10/2011; Trustive, a leading international WiFi access provider and N°1 in Europe, is very proud to be able to announce an almost 50% increase in it's Brazilian WiFi coverage, following the extension of its agreement with local operators, including major growth of Linktel's network. This latest expansion brings the number of premium Trustive WiFi hotspots in Brazil to 2500 locations, a real asset for Trustive customers travelling to or through the area.

Established 12 years ago, Linktel operates a WiFi network using the newest technology that complies with strict parameters of performance, safety and quality and thus guarantees large capacity bandwidth for data traffic. Trustive, on the other hand, has formed partnerships with 80+ local operators around the world, like Linktel, in order to create one unified, global WiFi network. Trustive's customers can enjoy seamless WiFi access across this entire network of 300,000 premium WiFi hotspots in 130 countries (via a single username and password plus a range of WiFi software for both computers and smartphones that automate the log in process).

Trustive's expanded WiFi coverage in Brazil now includes full coverage (in both the arrival and departure lounges) at 10 international airports (São Paulo - Guarulhos, Congonhas and Viracopos, Rio de Janeiro - Galeão and Santos Dumont, Confins, Curitiba, Brasília, Florianópolis and Porto Alegre), in the main shopping malls across Brazil, in popular restaurant chains, such as America Restaurante, in the 4-5* Estanplaza (including the Gran Estanplaza in Sao Paulo) and Transamérica hotels as well as full coverage across the university campuses of the PUC (Pontifícia Universidade Católica de São Paulo) and the Instituto Mauá de Tecnologia

All Trustive WiFi passes are valid across Trustive's entire WiFi hotspot network of 300,000 premium hotspots and offer customers real control over their budgets, with secure online payments & usage monitoring. In addition, Trustive offers a range of WiFi software for computers (Windows, Mac, Asus Eee PC), smartphones (iPhone and Android) and tablets (iPad and Android) to detect and connect to Trustive hotspots as well as a free secure web browser for customer's additional peace of mind. For up-to-date information about Trustive's WiFi coverage in Latin America or worldwide, customers can consult Trustive's online WiFi hotspot locator: www.trustive.com/hotspots/.

About Trustive

Trustive gives travellers comprehensive WiFi coverage by combining the hotspot locations of more than 80+ leading WiFi operators into one unified, global network of 300,000+ WiFi hotspots in 130 countries and allowing Trustive customers access to these locations through a single click (single username and password plus a range of WiFi software for both computers and smartphones that automate the log in process).
